Professional Work Experience

KAIZEN GAMING | .NET Back-End Engineer
April 2024 — Present

• Day to day collaboration with team members, refinement, retrospectives, two-week sprints, task discussion and knowledge share.
• Worked on the back-end to implement various features for the Euro/Copa America and fix bugs that required analyzing skills.

EPSILON NET | .NET Senior Back-End / Front-End Engineer
February 2020 — March 2024

• Adept at steering projects from conceptualization to execution.
• Leveraging a robust skill set in creating sophisticated blazor UI components, handling background services for seamless file imports, and executing hangfire jobs for resource intensive tasks.
• Proficient in implementing Identity Server 4 for SSO solutions, incorporating multi-tenancy, and developing custom views such as tenant subscriptions.
• Accomplished in crafting intricate invoice reports and subscription systems.
• Skilled in working with diverse databases, including NoSQL (MongoDB), MariaDB, and MSSQL.

ELLINAIR | .NET Back-End / Front-End Engineer
March 2017 — August 2019

• Created comprehensive test suites to ensure product functionality.
• Designed and implemented a client administration front-end for Identity Server 4.
• Successfully executed internal projects to meet specific company requests.
• Developed a recruitment web app, streamlining the company's hiring process.
• Developed a front-end email web client using Microsoft Exchange Web Service API.
• Utilized Asterisk Manager Interface for call tracking, note creation, and issue resolution in the call-center.
• Leveraged LDAP queries for fetching internal data, establishing internal contacts, departments, roles, and authentication.

MOUZENIDIS TRAVEL | Android Developer, .NET Junior Back-End / Front-End Engineer
September 2013 — March 2017

• Collaborating with the team lead to meticulously plan and execute the application flow, adhering to UI guidelines.
• Implementing coding techniques and incorporating best practices recommended by Google.
• Designing components in alignment with material design principles to ensure a seamless user experience.
• Introducing and refining UI layouts and features, seamlessly integrating geolocation functionalities while addressing and resolving memory leaks and other challenges.
• Employing the MVP pattern and utilizing Java for robust and scalable code.

AIRPORT RENT A CAR | Full-Stack Developer
November 2018 — February 2019

- **Project Initiation and Design:**
    - Conceived and designed the project, presenting mock-ups for client approval.
    - Translated designs into functional web layouts, ensuring a seamless user experience.
- **Development Expertise:**
    - Utilized Bootstrap 4 for front-end development, enhancing responsiveness and user interface.
    - Developed a robust back-end using ASP.NET Framework 4.7 and C# 7.1.
    - Developed a dynamic pricing algorithm in C#, considering date ranges, sessions, discounts, and overtime fees.
    - Used MySQL for data warehousing.
    - Developed a comprehensive management dashboard for administrators.
    - Enabled effective categorization of cars, access to reservation calendars, user database management.

TRESOR SOUSOURAS HOTEL | Full-Stack Developer
May 2017 — June 2017

- Orchestrated the creation of mock-ups using Photoshop, providing visual representations of the proposed designs for client review.

- Translated conceptualized designs into fully functional web layouts, demonstrating proficiency in front-end development.

- Crafted an engaging web application featuring an impactful homepage, a user-friendly contact page, and a dynamic gallery.

- Responded adeptly to client requests by seamlessly integrating an external booking widget from Web Hotelier into the web application.

Education
IEK DELTA 360 – Web Design & Development
Thessaloniki | September 2011 — June 2013

New York College – Project Managment
Thessaloniki | July 2023 — July 2023
